■Notes

The sewing dimensions may not match due to the accumulation of slight deviations such as the thickness of the leather, the core material, or the thickness of the core material, and it may not be possible to make it neatly. Also, depending on the performance of the printer and the expansion and contraction of the paper, the output may not be accurate, so check the areas where you need to be careful about the deviation of 1 mm (0.0394 inch) before using.
